School Attendance on Days of Scheduled Activities

Students must attend regularly scheduled classes on the day they participate in any student activity. When school is in session, the student must be in attendance at least $\frac{1}{2}$ of the school day (four class periods on a regular school day or adjusted for abbreviated schedules) in order to be eligible to practice, rehearse, or perform on that same day. The activities director or principal may waive this requirement for funerals, medical appointments, and other extenuating circumstances.
